

## **ORGANIZATION OF INSTRUCTION BY GRADES AND BUILDINGS**

The North Middlesex Regional School District acknowledges that the organization of instruction should maximize the educational opportunities offered for all students. The organization of instruction includes, but is not limited to, the grades and programs offered in each building.

Based on superintendent recommendations, the school committee will have final approval of the structure of the school district by grades and buildings.

Any changes to the organization of regular and special education instruction must be brought to the school committee during the budget process for final approval.
